

All samples require a special container. We are happy to provide these containers when you place your water test request.

Well Water Testing Options

Test	Results	Price
Annual Testing Package Includes tests that are recommended on an annual basis. Note: If nitrate is elevated, the pesticide/herbicide screen is recommended. Results: Coliform Bacteria, E.coli, Nitrate & Arsenic	3-5 Business Days	\$95.00
Basic Homeowner Package This package is designed to inform you of the basic health and safety of your water. Results: Annual Testing Package PLUS Lead, Fluoride, Chlorides, Phosphates & Sulfates.	7-10 Business Days	\$225.00
Well Water Quality Package Recommended for well water sources to check basic health concerns plus the minerals/metals commonly found in ground water. Results: Basic homeowner package PLUS Minerals/Metals Scan (listed below)	Up to 3 Weeks	\$350.00
Comprehensive Water Package A more in-depth analysis of ground water contaminants including gasoline, diesel fuel & industrial contamination. Results: Well Water Quality Package PLUS VOC's (listed below)	3-4 Weeks	\$450.00
Complete Water Package Designed for individuals who want to test their water for "everything" that well owners should be aware of. This package screens for the same contaminants that most municipalities test for, but at an affordable rate. Results: Comprehensive Water Package PLUS Gross Alpha/Beta & Atrazine Screen	Up to 6 Weeks	\$650.00
Minerals/Metals Scan Groundwater is stored in various rocks and sediment formations. The type of rock or sediment formation is a major factor in determining the overall quality of your water. The Minerals/Metals Scan screens for minerals commonly found in groundwater, as well as metals commonly found in landfills and dumps. Results: Aluminum, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chlorides, Chromium, Cobalt, Copper, Fluoride, Iron, Lead, Lithium, Magnesium, Manganese, Molybdenum, Nickel Phosphate, Phosphorus, Potassium, Silicon, Silver, Sodium, Strontium, Sulfate, Vanadium & Zinc	3-4 Weeks	\$275.00
Volatile Organic Chemical Test (VOC's) VOC's are a group of commonly used chemicals that evaporate or volatilize when exposed to air. This test screens for the most common industrial contaminants and gasoline. * EPA recommends testing every 3-5 years. Results: Petroleum Volatile Organic Chemicals (PVOC), trichloroethylene (TCE), Trichloroethane, benzene, toluene, xylenes, PLUS more (total of 52 compounds)	3-4 Weeks	\$250.00
Atrazine Screen Screening for pesticides used in agriculture. Strongly recommended if nitrate is present in your water. NOTE: Atrazine Screen is an approximate test. Results: Atrazine and several chemicals it breaks down into	3-4 Weeks	\$150.00
Glyphosate Broad-spectrum herbicide, also known as the active ingredient in RoundUp™. Results: Glyphosate	4 Weeks	\$250.00
Pesticide/Herbicide Screen Screening for the most commonly used pesticides and herbicides for both agriculture and household. Strongly recommended if nitrate is present. Results: Atrazine, Alachlor, Cyanazine, Simazine, Butylate, Propachlor, Metolachlor, Simazine PLUS more (total of 23 compounds)	4 Weeks	\$350.00
Gross Alpha/Beta Screening for the presence of radioactivity in water.	4 Weeks	\$150.00
Radium 226/228 Recommended if Gross Alpha/Beta is high.	4 Weeks	\$400.00
